- Security: Active Secret Clearance with eligibility for Top Secret; experience working with PII and sensitive data

Experience

UI/UX Designer for Government Client, MARCH 2023 - PRESENT

Acuity Inc, Arlington, VA

- Design prototypes of user interfaces and interactions for enterprise applications, including complex task flows and user journeys, and incorporation of AI and a Language Learning Model (LLM), to create user-friendly workflows that solve users' problems. Become Subject Matter Expert (SME) for assigned applications
- Conduct user testing to determine preferences and pain points, and iterate on designs to solve these problems
- Present designs to stakeholders in order to collaborate and brainstorm to improve applications
- Collaborate to determine business requirements, priorities, and to ensure designs meet business needs
- Create components for the program-wide design system to improve efficiency for designers and developers

Web Content Manager - UI/UX Designer for US Coast Guard (USCG) JULY 2008 – FEB 2023

Acuity Inc. (formerly with ManTech International), Portsmouth, VA

- Improved efficiency by designing user-friendly web interfaces and digital business applications for 70,000+ users, decreasing time on task for common processes used by the command and the fleet
- Increased portal engagement and improved user feedback by establishing a successful Intranet, intuitive information architecture and interactions, and a knowledge system that became a role model for other units

- Streamlined maintenance and increase data integrity by successfully developing centralized and authoritative knowledge library that integrates with the service catalog, and by developing automation to minimize costs
- Facilitated Coast Guard users in adopting new technology during the USCG's 'Tech Revolution'
- Empathized with user needs while providing technical support, gathering user feedback, and analyzing user pain points. Problem-solved and improved user journeys, resulting in positive client feedback
- Improved customer service and business processes during major organizational upheaval and successfully helped launch new Intranet infrastructure for new unit of 1,000+ staff, praised by client for effective high-quality work.
- Mentored junior portal administrators and users with technical assistance and knowledge while helping build a culture of collaboration and ongoing learning
- Adapted to new technology and developed training for power users on SharePoint and other M365 tools

User Interface (UI) Designer and Artist NOVEMBER 2005 - PRESENT

Self-Employed Freelance Designer, Carrollton, VA

- Improved online presence and branding for small businesses, startups, and non-profit organizations
- User interface (UI) design, front end web development, graphic design, branding, photography, illustration, painting, art exhibitions, mentoring, and teaching Photoshop lessons
- Received numerous design, art, and photography awards and honors, 2006 - 2019
- Published in Best of America Oil Artists & Artisans, Volume 1 book, 2007
- Selected as artist for Smithfield 20/20 Porcine Parade public art project for the town of Smithfield, VA, 2012

Visual Designer / Web Author AUGUST 2000 - NOVEMBER 2005

CACI (formerly American Management Systems), Norfolk, VA

- Created user-friendly distance learning on award-winning team for various Department of Defense (DoD) and other government agencies, such as National Institutes of Health (NIH), consistently receiving positive client feedback
- Roles included user interface (UI) design, storyboarding, front end development, animation design, photography, user testing, interaction design, technical writing, and editing
- Received coin of recognition from Army JROTC client for successful distance learning project, 2003
